METI
Requested Patent: JP2001309797
Application Number: JP20000133977 20000502
Priority Number(s):
IPC Classification: C12P7/64; C11C3/00; C12N1/00; C12N1/20
EC Classification:
Equivalents: JP3477512B2

Abstract

PROBLEM TO BE SOLVED: To provide a method for producing a highly unsaturated fatty acid capable of increasing the amount of its production by using a highly unsaturated fatty acid-producing microorganism.

SOLUTION: This method for producing the highly unsaturated fatty acid is characterized by culturing the microorganism having the highly unsaturated fatty acid-producing capability in a medium containing a fatty acid synthesis inhibitor, cerulenin.
